

OUR MOUNTAIN

is

OUR WAVE

2019-2020

"SHAPING A BOARD IS A FORM OF ART, THAT NO COMPUTER CAN DO AS WELL AS A PERSON. THERE'S NOTHING WE ENJOY MORE THAN THE HOURS OF RIDING, CONCEPTUALIZING, SHARING, AND TESTING THAT ARE REQUIRED TO REACH PERFECTION. SWITZERLAND IS OUR HOMETLAND. THE LANDSCAPE IS OUR INSPIRATION. AND OUR BOARDS ARE THE RESULT. "

NOSE SHAPE

The board's nose is the first thing to come into contact with the elements. This is why it has to be adapted to the riding intention of each board. It's the gateway to heaven.

SIDECUT SHAPE

The radius is similar to the steering wheel of your car. A smaller radius will naturally make the board turn shorter, and vice versa. The real secret is an adjusted radius next to the contact edges, allowing you to turn with ease.

TAIL SHAPE

The tail is what allows you to finish your turn and initiate the next one. It's the secret to a reactive board with character.

MOSQUITO

BLUNT

The Blunt nose shape reduces the nose length, optimising the surface. This very direct style is ideal for carving.

A short side cut from seven meters, designed for aggressive and radical runs.

R7 SERIES

FISH

This style is made specifically for short running edges, speeding up your board like never before.

SMOKE

DIAMOND

The Diamond nose is the most versatile shape for a slysh everyday ride.

A medium side cut from 8+ meters for medium radius turns...Perfect for cruising and versatile for the everyday ride

R8 SERIES

DIAMOND

The Diamond Tail helps finish your turns easily & is made specifically for long radius sidecuts & long length running edges.

GUN

GUN

The Gun nose shape allows you to charge and go fast in any type of snow, from a deep powder field to springtime slushy snow.

A long side cut from 10+ meters for fast long turns and for charging.

R10 SERIES

DIAMOND

The Diamond Tail helps finish your turns easily & is made specifically for long radius sidecuts & long length running edges.

SHRED SHORT CARVE EXPLODE

Fast and Nervous

MOSQUITO

SHRED - SHORT CARVE - EXPLODE

Fast and Nervous

This board is built for the rider who is not afraid to ride short boards built with a lot of character. Small side cut radius and short running edges result in something powerful, allowing you to ride fast and smooth.

The logo was designed by Henry Nidecker's grandmother in 1946. The shape is inspired by the first appeared Nidecker board in 1984 authentic to the core.

FEATURES

- ASH VENEER
- COMBO TRIAX AND BIAx FIBERS
- NIDACTIVE WOOD CORE
- 9900 SINTERED
- OVER SIZE RECYCLED SEL EDGES

SPECS

SMOKE

CRUZE - MID CARVE - ABSORB

Riding never felt so steamy

S M O K E

CRUZE - MID CARVE - ABSORB

Riding never felt so steamy

This board is a classic side cut from the 90's. Medium side cut and regular sizes give you versatility and comfort. The construction absorbs terrain perfectly, allowing you to maximize fun.

The inspiration for this board came directly from the original Donuts snowboard brand born in 1995 and produced in the Nidecker factory. This is a wink to TK's first shapes.

CHARGE LONG CARVE FLOW

Go shred...shoot!

GUN

CHARGE - LONG CARVE - FLOW

Go shred..shoot!

As a true surf gun, this board is made for those who want to charge. Long side cuts radius and long running edges provide stability while still allowing you to carve like no one else. We also created a shorter version for those who want to charge but with less speed.

Born from the first globally known Nidecker boards in the 80s, mixing old and new shape and logo.

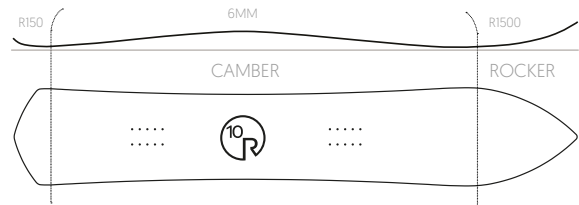

FEATURES

- ASH VENEER
- COMBO TRIAX AND BIAx FIBERS
- NIDPONSIVE WOOD CORE
- 9900 SINTERED
- OVER SIZE RECYCLED SEL EDGES

SPECS

OVER LENGTH [CM]	174
SIDECUT RADIUS [MM]	10000
EFFECTIVE LENGTH [MM]	1110

FRONT FOOT WIDTH [MM]	266
BACK FOOT WIDTH [MM]	265
STANCE WIDTH [MM]	540

THE WRONG SET UP IS LIKE... PLAYING GUITAR WITH A PAIR OF BOXING GLOVES

SETUP

NATURAL STANCE

The Natural Stance is not just a feeling; it's a calculation of body geometry using the golden ratio as reference. Your body architecture establishes your personal stance, giving you the best ratio of balance and force.

FRONT FOOT ANGLE

The front foot establishes your direction and engages your turn. This is why it's so important to have an angle between 20 and 30 degrees, which provides the perfect mix of balance and engagement.

BACK FOOT ANGLE

The back foot gives you the balance and energy required to finish your turn. This is why it's so important to have an angle between 10 and 10 degrees the sweet spot of stability and power. Adding a canting plate on the back foot gives you more of both.

Check it out!

FEATURES

CONSTRUCTION

This brand new type of construction inspired by surf boards is a completely unique approach to snowboarding. It creates this special feeling that makes us like no other... try it and see for yourself...

TOP SHEET

All of our top sheets use wood the best natural, light dampener material available. We choose the best type of wood for the boards. We adapted the best wood essence... Ash veneer for more absorption and responsiveness.

FIBER

The combination of Triax on the top and Biax on the bottom results in true sturdiness under your feet. Crafted with the proper torsion box, this combo transfers energy for ultimate responsiveness.

WOOD CORE

NIDACTIVE WOODCORE:

This unique wood core mixes Poplar and Paulownia to create the best lightness, responsiveness, and absorption ratios.

NIDPONSIVE WOODCORE:

This exclusive wood core combines Poplar and Bamboo to achieve the ideal combination of lightness and responsiveness.

BASE

The ultra-fast base is made of ultra-high molecular weight polyethylene (UHMW-PE) and carbon. It is prepared with a factory-tuned, wend-performance natural wax and premium belt ground finish, resulting in a smooth, fast ride in all conditions.

“ REMEMBER YOU ARE UNIQUE
JUST LIKE EVERYONE ELSE... ”

What we do

To keep the stoke of surfing alive so far from the ocean, former pro snowboarder turned shaper, Thierry Kunz had to find a way to surf the mountains at home in the Swiss Alps. His solution was to design a line of boards that requires a riding style driven off the back foot, just like driving through a turn off the bottom of a wave.

Who we do it for

Our snowsurfs are made for experienced riders over 30 who spend as much time in the water as they do on snow. That's why if you're truly dedicated to riding, you've acquired a quiver of boards perfect for everything from slashing spring slush to laying down big turns through steep and deep fields of powder.
